

RHANNY BELLE URBIS

AI Automation Engineer / Backend Engineer

Mobile: +63 9662740596 | **Email:** raniurbis@gmail.com | [LinkedIn](#) | [Medium](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

AI Automation & Backend Engineer specializing in Claude AI-assisted workflows, n8n-based production automations, ETL pipelines, and API-driven systems. Strong experience designing reliable business automations using advanced prompting, structured outputs, AI agents, n8n, Python, FastAPI, and databases, with a focus on security, observability, reliability, and workflow optimization. With 10+ years in NGO research and data analytics.

Work Experience

AI Automation Engineer (Part-Time) Strategic AI Consultants

March 2026-Present

- Automated a manual predictive lead scoring and saved up to 75% of their time by building a full-stack application predictive lead scoring system orchestrated with n8n and integrated with WelcomeHome CRM, Google Sheets, Google Drive and Supabase.
- Saved up to 3 hours per client by building an n8n client onboarding system which integrated Google Sheets, ClickUp, Gmail and Slack
- Analyze processes, recommend the best tools and automation solutions to build the most efficient and secure business enhancements in sales, marketing, and operations.
- Designed Claude AI-assisted workflow prompts, structured-output instructions, and automation handoff logic for business operations requiring reliable task routing and repeatable outputs.

AI Automation Engineer PopAI Technologies

August 2025-April 2026

- Built 5 major features of a RAG agent, and delivered backends of 3 standalone sales agents and 4 recruitment agents integrated in enterprise agentic AI (PopAI Knowledge Manager, PopAI Sales Agents, PopAI Recruitment Agents)
- Automated 30-50% of client workflow processes by building n8n workflows integrated with Langchain agents, FastAPI services, PostgreSQL/Supabase, CRMs, Slack, Telegram, Google Workspace, voice/search APIs
- Designed and built ETL-based automated reporting, KPI monitoring, websocket-based message monitoring, and quality assurance systems as part of internal agentic AI solutions.
- Implemented monitoring, Agno migration, failure handling, and notification workflows for internal and production workflows and agents
- Collaborated with project managers, frontend, QA and end-users to ensure user-centric requirements
- Created user and technical documentation, QA guides and conducted API testing to ensure optimum agent performance
- Developed AI-assisted operational workflows using prompt engineering, structured outputs, tool/API handoffs, and failure-aware automation design for scalable client and internal processes.

Team Lead / AI Specialist Behavior Education Services Team (BEST)

March 2025 – August 2025

- Led process improvements, automated workflow development and AI solutions that increased productivity in Global HR and BA Recruitment departments at 50%
- Led the design and development of an automated OCR/info extraction app for tenant application forms to create faster and automated application processing for its sister company, Evercrest Homes

- Designed and created training materials and conducted AI training for different departments and teams to achieve 86% business AI-fluency

Remote Placement Specialist / Data Analyst

Talents2Germany

August 2024 to March 2025

- Automated HR, recruitment, and reporting workflows using Python, Appscript and APIs.
- Reduced manual steps via scheduled, webhook-based, and conditional workflows
- Increased team productivity by 50% through automation of candidate job application updates and FAQ chatbot development
- Designed and developed automated data analysis and predictive data analysis to help formulate business strategies and decision-making

Campaigns, Advocacy, and Networking Staff for Ilocos Region

Katinnulong Dagiti Umili iti Amianan, Inc.

October 2010 to May 2020

- Lead 30+ comprehensive research, predictive and automated data analysis for funding efforts

Education

University of Northern Philippines

Bachelor of Science in Computer Science

Skills

- **Programming Languages**
Python, JavaScript, TypeScript
- **Backend & Frontend Frameworks**
FastAPI, Django, React, Next.js
- **AI Engineering & Agent Development**
LangChain, LangGraph, LiteLLM, ReAct Agents, RAG, tool-calling workflows, multimodal AI workflows
- **AI APIs & Voice/Video Platforms**
OpenAI, ElevenLabs, Tavus, Recall.ai, LiveKit, ManusAI
- **Automation & Workflow Orchestration**
n8n, Make, Zapier, Google Apps Script, webhooks, async workflows
- **Databases & Vector Storage**
PostgreSQL, Supabase, SQLite, pgvector, Milvus/Zilliz, Pinecone
- **API Integrations**
Slack, Telegram, HubSpot, Zoho CRM, Zoho Recruit, Zendesk, Google Workspace, Google Search Console, Ahrefs, Exa, Tavily, Firecrawl
- **Cloud Platforms**
AWS: ECR, EC2, Secrets Manager, IAM, S3
Azure: ACR, Container Apps, Key Vault, RBAC, Managed Identity
GCP: Cloud Run, Artifact Registry, GCS, Secret Manager, IAM, Service Accounts
- **Infrastructure, DevOps & CI/CD**
Terraform, Git, GitHub, GitHub Actions, Docker
- **Testing & Code Quality**
Postman, PyTest, Ruff, Vitest, linting
- **Development & AI Coding Tools**
VS Code, OpenAI Codex, Claude Code
